

Sunny Days Children's Fund

Thank You for Your Support

Below are just some of the recent families we have been able to help for more details of the work we have been doing please visit our website at www.sunnydaysfund.org.uk

		
<p>Chloe was born with an unexplained moderate learning difficulty and a very mild physical disability. When she was 9 however she suddenly developed severe Childhood Generalised Primary Dystonia. We agreed to a request for an iPad which could be attached to her wheelchair and allow Chloe her independence with her music which other 17 year olds take for granted and with the help of other apps to aid her education.</p>	<p>Daniel has a severe heart defect and has had two major surgeries on bypass to give him a 'fontan circulation'. Since he has only one ventricle in his heart his blood circulation now goes around his body and through his lungs. He has been put on warfarin for life (to thin his blood) so it can glide past the scar tissue. We agreed to help fund a Coagucheck XS Systemkit which will enable his parents to check the levels of warfarin and pick up on any problems early.</p>	<p>Ashley has a lot of health needs and he has been diagnosed with Congenital Chromosomal Abnormality, Learning difficulties and Global Development Delay. After a request from Specialist Children's Services we were happy to provide Ashley with a laptop Computer to help with his school work. As Ashley is from a single parent family we also provided funding for his new school uniform.</p>
 <p>Robbie suffers with childhood onset dystonia. Robbie first showed signs of the condition just before his 4th birthday, and progressively has gone downhill from this time, to the extent he now uses a wheelchair 95% of the time, apart from the mobility issues in his legs, he also has extreme gross motor skills problems in his arms and back. Whilst the condition is not curable Robbie is currently awaiting confirmation of a bran implant (DBS) which should help to improve his mobility issues. We received a request for funding for an iPad, which has many apps that would assist Robbie with his school work, as he has very limited movement and struggles to control a PC mouse. We were pleased to supply the funding for Robbie.</p>	 <p>Piers has downs syndrome and Perthes disease (a disease of the hip). Piers loves to be outdoors but cannot ride a conventional bike because the Perthes disease affects his mobility. We were happy to help with funding for a specially adapted trike, which enables him to remain mobile on his bad days.</p>	

4 Cressing Road, Braintree, Essex, CM7 3PP.
